OUR BUSINESS

AS A WHOLLY OWNED SUBSIDIARY OF THE BMD GROUP, BMD URBAN IS A SPECIALIST CIVIL AND BUILDING CONTRACTOR TO LOCAL AUTHORITIES AND THE URBAN DEVELOPMENT INDUSTRY, OPERATING THROUGHOUT AUSTRALIA.

BMD Urban draws on extensive experience from within the BMD Group and utilises robust management systems, delivery methodologies and a relationship based approach, specifically tailored to the needs of the industry.

Integrated services can be offered by BMD Urban in partnership with Empower Engineers & Project Managers (Empower), JMac Constructions (JMac) and Urbex to achieve seamless and cost effective project delivery. Our extensive network of offices located throughout Australia enables us to engage with locally based suppliers and subcontractors and provides the flexibility to deliver high quality construction services to every corner of the country.

BMD Urban's diverse portfolio of civil construction capabilities include earthworks, roadworks construction and maintenance, subdivisions, water and wastewater infrastructure, bikeways, sporting facilities, community infrastructure and airport infrastructure. We pride ourselves on our ability to transform spaces into iconic, usable precincts, bringing communities together.

Working collaboratively with clients, stakeholders and the community is not just an 'add on' for BMD Urban project teams, it is an integral philosophy that is at the cornerstone of our family owned business. We have a strong network of subcontractors and suppliers who seamlessly join our project teams to deliver on time and on budget.

BMD Urban's project delivery excellence has been consistently recognised by national and international industry organisations with a number of prestigious awards. BMD Urban is proud of the long standing relationship and affiliation with numerous state, national and industry groups including Roads Australia, Engineers Australia, Civil Contractors Federation and local authorities across Australia.

LONG-TERM CLIENT RELATIONSHIPS HAVE BEEN THE FOUNDATION OF OUR SUCCESS. WHAT MAKES BMD DIFFERENT IS OUR VALUE SYSTEM, UNIQUE CULTURE AND GENERAL COMMITMENT TO ALL STAFF. OUR STRATEGY IS SIMPLE: VALUE OUR PEOPLE, COLLABORATE WITH OUR PARTNERS AND CONTINUE TO DELIVER EXCEPTIONAL PROJECTS WITH SUSTAINABLE OUTCOMES.

LOCAL INDUSTRY PARTICIPATION

In line with the BMD Group's approach to business, BMD Urban's operations are firmly underpinned by a philosophy to 'support the local communities in which we operate' – a philosophy that was well established long before local industry participation initiatives were formally introduced.

BMD's mission is to professionally manage our suppliers and subcontractors to achieve the best possible outcomes for our clients, including aiding in the development of the local industry.

Since establishment in 1979, BMD has employed a policy of engaging locally based suppliers and owner operators. This policy serves to maximise the opportunity for local input with flow on effects in the training and development of locally based staff engaged on our projects. We are proud of the long-term, key supplier relationships that have developed as a result of this philosophy.

THE BMD WAY

COMMUNITY AND INDIGENOUS ENGAGEMENT

Building on BMD's founding philosophy, BMD Urban approaches each project individually, actively identifying opportunities for local community engagement and participation that will provide beneficial outcomes for the project team, client and local community alike.

We work in partnership with Indigenous and non-Indigenous organisations who embody our values to achieve long lasting benefits in areas including health and wellbeing, arts and culture, job creation, environment, and social and community development.

Our continued focus is on equal opportunities and increasing our commitment to Indigenous engagement across the Group to create a diverse workforce. We have extensive experience working in regional and remote areas and within Aboriginal and Torres Strait Islander communities. Our policies, plans, initiatives and training programs support our commitment to provide equal opportunities. Over the past 10 years, we have worked diligently to engage and train Indigenous employees with the establishment of Indigenous participation plans on numerous projects.

BUSINESS MANAGEMENT SYSTEMS

BMD's management systems have the structure, depth and flexibility to guide the successful delivery of even the most complex of projects. The BMD Management System is designed to create an integrated approach to cost, time, quality, safety and environmental management. Based on the company's philosophy and corporate policies, the system provides the necessary plans, procedures, training and reporting systems to assist our teams in the delivery of projects based on industry best practice.

DELIVERING ON OUR ZERO HARM GOAL

We apply the same health, safety and environmental management systems across all our projects regardless of their size or complexity and they guide our teams towards our goal of Zero Harm.

BMD Urban currently hold a number of industry recognised multi-site certifications for quality, health, safety and environmental management systems, as part of its integrated Business Management System (BMS). BMD's management system allows for flexibility on a project by project basis, while ensuring the client's requirements are addressed and the project is delivered in full compliance with the relevant specifications and regulations.

BMD is proud of our achievements in safety and environment and we are determined to further our commitment to a level that makes the BMD Group synonymous with excellent safety performance, regardless of the challenges in any project we undertake. Our environmental management performance has also been recognised through multiple industry awards for environmental and construction excellence.

TIMELY DELIVERY OF PROJECTS

We invest in a collaborative approach with clients and partners from early stages of projects, identifying key challenges, managing risks, allocating appropriate resources and setting clear roles and responsibilities. Through open and frequent communication, our teams work effectively and efficiently to deliver industry best practice and acceleration of stages throughout the construction period.

We understand that the timely delivery of projects enhances our clients' return on investment and implement the necessary project management tools and controls to ensure this happens whenever possible.

The breadth of our engineering and construction expertise coupled with our collaborative approach enables us to deliver both small and large scale public infrastructure projects efficiently and effectively.

GOYDER SQUARE REDEVELOPMENT

PALMERSTON, NT | \$5.6 MILLION

PALMERSTON CITY COUNCIL

Palmerston City Council contracted BMD Urban for the Goyder Square Redevelopment project located in Palmerston, 20 minutes east of Darwin. The new look square has grown into a shady, green haven for residents and includes a continuous open space link from Goyder Square to the water tower park, an open grassed area, an interactive water feature, playground, shade structure, performance space to hold community events, outdoor seating and a new convenient layout for the Palmerston Markets.

Working in partnership with JMac Constructions, we completed the project on budget and on schedule. Delays were experienced early on in the project due to unknown existing services being found. The project team introduced night shifts and weekend works to accelerate the program and make up the lost time. Despite these initial delays, the project was handed over in time for the City of Palmerston's Christmas tree lighting ceremony.

BMD Urban is proud to have delivered an iconic project that is a vital community asset and demonstrates strong capabilities in both soft and hard landscaping features.

KEY OUTCOMES

- In order to reduce impacts to adjacent businesses and buildings, a road profiler was used to demolish the majority of the original concrete surfaces to minimise noise and vibrations.
- The project team was committed to safety, with the project delivered lost time injury free.

ANZAC CENTENARY MEMORIAL WALK

ADELAIDE, SA | \$8.2 MILLION

DEPARTMENT OF PLANNING AND INFRASTRUCTURE

The Anzac Centenary Memorial Walk is South Australia's flagship project to commemorate the Centenary of Anzac. Located along Kintore Avenue from the South Australian National War Memorial to the Torrens Parade Ground, it involved the construction of a 7 metre wide granite paved walkway, flanked on one side by a new Government House fence and on the other by a raised granite clad garden bed.

The Memorial Walk's new fence features a 60 metre section of granite panels etched with images from a century of service by Australian defence personnel, to acknowledge the sacrifice of all Australians who have been affected by war.

BMD Urban was honoured to have been appointed head contractor to deliver an iconic feature within the city centre, providing a quality product that honours the Anzac spirit.

KEY OUTCOMES

- The project was delivered on time and budget, ready for the official opening by the Governor His Excellency the Honourable Hieu Van Le AC and the Anzac Day commemorations.
- The project's timely delivery was achieved despite a significant increase in scope variation, only instructed during the Christmas period of 2015.
- The team absorbed this additional scope within a post-Christmas program by extending working time to seven days a week. This ensured the project completion date was achieved.

COLLABORATIVE CONTRACTING

We pride ourselves on a collaborative approach to business and using our integrated service delivery model to provide seamless and cost effective project outcomes for clients. We are able to offer our clients benefits including, 'hassle free' project delivery, a positive and productive working environment and specialist project teams.

Unique to BMD is our ability to manage the sheer magnitude of our projects in a way that our competitors cannot. We deliver smaller jobs in value of \$500,000, whilst simultaneously delivering up to \$100 million landmark projects. This approach makes us much more diversified and means our clients save on overheads by not having to pay 'margin on margin'. Integrated services can be offered by BMD Urban in partnership with Empower, JMac and Urbex to achieve seamless and cost effective project delivery.

By capitalising on the offering of the Group across a range of market sectors, BMD maintains a strong foundation within the business for our people, our clients and communities. Building on this foundation is key to our success and ensures that each of our business units continue to offer tailored services for clients both solely and in conjunction with one another.

"On behalf of Council, I wish to take this opportunity to thank all at BMD Urban for your outstanding work on the Beenleigh Town Square Project. The project was well received by the community and Council alike and was recently awarded the Great Place Award at this year's Planning Institute of Australia Awards for Planning Excellence – Queensland. This award is testimony to the efforts of a great team and collaboration between the contractor, consultants and Council."

Ella du Plessis, Senior Development Planner, Logan City Council

GOLD COAST PARKLANDS PROJECT

SOUTHPORT, QLD | \$68 MILLION

GROCON (PARKLANDS) PTY LTD

The Commonwealth Games will be one of Queensland's largest and most prestigious sporting events when athletes from across the world converge on the Gold Coast in 2018. Grocon awarded BMD Urban and JMac packages for the Parklands project to build the infrastructure required for the Commonwealth Games athletes' village. The village will house the athletes and provide facilities for the sporting events to take place. In the long-term, the area will form the key residential, commercial and retail part of the Gold Coast Health and Knowledge Precinct.

The project consists of nine separable portions, including the relocation of the western force sewer rising main and internal subdivisional works which will allow the builders to commence works. The works involved clearing vegetation, bulk earthworks, trunk sewer and stormwater structures, installation of services (including water, gas, low voltage and high voltage electrical and National Broadband Network), roadworks, and both soft and hard landscaping. As part of the project, JMac was awarded the \$17 million package of landscaping work to create a recreational precinct for residents. Major landscaping works will include all streetscapes throughout the precinct, formed concrete walls, decorative pavements and bespoke custom furniture. The project will also include the instillation of "The Village Heart", a large custom designed cantilevered, fibre reinforced, polyclad building with an integrated disc water feature.

KEY OUTCOMES

- Collaboration between BMD Urban and JMac saw the client save on overheads by not having to pay 'margin on margin'.
- BMD Urban has brought many innovative ideas to the table through the course of the design and construct contract which has enabled the client to realise further cost savings during construction.
- The design of the Parklands project has been focused around The Village Heart and creating an atmosphere for families and the like to visit. The focus on the health and learning precinct shows the desire to expand the existing surrounding stakeholders including Griffith University and the Gold Coast University Hospital.

BEENLEIGH TOWN SQUARE

BEENLEIGH, QLD | \$8.2 MILLION

LOGAN CITY COUNCIL

BMD Urban and JMac delivered a vibrant community centre in the heart of the Beenleigh Business Precinct for Logan City Council. The project involved a mix of construction disciplines including civil, electrical and landscaping, as well as communication and coordination with various government and private stakeholders. BMD Urban completed the preliminary works, as well as the civil and external works. This included the service location and demolition of pavements and trees, reclamation of public artworks and historic street furniture, conversion of the existing six-way roundabout into a signalised intersection and construction of turning circles at James and Kent streets. The result was a vibrant open space that includes a civic platform, pavilion structure and open air market space.

JMac was awarded the \$3.75 million landscaping package, as part of the project. This involved the development of the Beenleigh Town Square including civil, landscaping and minor structure works. The collaboration between the two BMD Group companies delivered an outcome which the client was extremely happy with and enabled the creation of a community hub which has reinvigorated the Beenleigh township.

KEY OUTCOMES

- The project was completed on budget and all milestones were met within the scheduled timeframes.
- The project delivered a variety of streetscape elements to enhance pedestrian amenity and ensure a consistent and attractive character, introducing vibrant colour, shade, efficient lighting and vegetation.
- Consistent communication with local businesses and stakeholders, as well as effective traffic control planning on the project resulted in minimal disruption and limited traffic congestion and confusion during the road closures.

CAPACITY OF PROJECT TEAMS

BMD Urban has the resources and experience to deliver projects ranging in size and complexity. We have the capacity to integrate with other BMD companies to provide the optimum level of service to our clients across the value chain. Our commitment to understanding our clients' needs and exceeding their expectations remains the same, regardless of the project size or value.

With a national footprint, we have the ability to build and retain experienced and skilled project teams. Our focus is on fostering and retaining a high performance culture amongst our teams, and we understand that the success of our projects is based on our people. Regardless of where or what we are working on, BMD Urban is committed to providing more, doing more and giving confidence to our clients and partners.

We carefully structure our project teams to ensure the right people with the right skills have the capability to deliver exceptional results. At the heart of our services is our engineering and construction expertise, and this combined with our resources and experience across every facet of community infrastructure means we always meet project demands with quality, commitment and collaboration.

"BMD produced a high quality outcome which has received favourable comments from ACT Government agencies, the developer and the local Crace community. The project was unique in the ACT and has become a model for the construction of similar facilities in other subdivisions."

**John Randall, Managing Director,
Indesco Pty Limited (Client's Superintendent, CRIP)**

COMMUNITY RECREATION IRRIGATED PARK (CRIP)

GRACE ESTATE, ACT | \$8 MILLION

CANBERRA INVESTMENT CORPORATION LIMITED

BMD Urban delivered various stages of Crace Estate over a four year period. The scope included the delivery of the Community Recreation Irrigated Park (CRIP) which is an area with gardens, wetlands, netball courts, rebound walls, as well as playgrounds and workout equipment.

Works included earthworks, sewer, stormwater and water main works, wetlands and irrigation ponds, installation of playground and work out equipment, as well as extensive landscaping, including the irrigation system, and construction of pump stations and associated infrastructure.

Earmarked as a strategic infrastructure priority under the ACT Government Infrastructure Plan, the park is a focal point for the recreation, leisure, social and community events at Crace.

BMD, together with key subcontractors and the client, put in place a rigorous programming process which included daily, weekly and monthly reviews to enable works to progress during wet weather periods. The continual review of the program, together with the collaborative approach of the entire team, enabled BMD to identify opportunities where work could progress immediately, as opposed to what was originally pre-defined.

KEY OUTCOMES

- The project team established a rigorous regime of re-programming, re-sequencing and communication with key stakeholders to continually drive progress and innovation.
- As the landscaping covered the majority of the site, it was imperative to strip and save as much topsoil as possible to achieve the budget and reduce environmental impacts. Due to careful use and maximisation of the available material, only minimal importation of topsoil was required.
- To manage wet weather, programs were continually updated and revised (more than typical) to reflect the changing site conditions brought about by the varying weather impacts.
- Relationships with the client, superintendent, subcontractors, suppliers and other key stakeholders remained positive, driving the team and innovation throughout the delivery phase, despite the challenges faced.
- The project was awarded the 2013 Master Builders Australian Capital Territory Award for the civil subdivision category.

HEALTH CITY BULK EARTHWORKS

SPRINGFIELD, QLD | \$5.2 MILLION

SPRINGFIELD LAND CORPORATION

Health City Springfield Central is the designated centre of the health and wellness offering for local residents in Greater Springfield. Springfield Land Corporation engaged BMD Urban to complete bulk earthworks for future development in the Health City Precinct including aged care facilities, hospital expansion and future road developments. Works included 30 hectares of clearing and grubbing, cut to fill and exports offsite, construction of a Q100 detention basin, soil stabilisation and scour protection work.

The project is situated within the growing community and adjacent to major key stakeholders including Mater Hospital, Saint Peters School, University of Southern Queensland and local residents.

BMD worked closely with Springfield Land Corporation and Ipswich City Council through open discussions via regular onsite meetings and by working effectively and efficiently, to deliver industry best practice on the project.

KEY OUTCOMES

- The project has improved public awareness regarding effectively managing onsite material (i.e. mulch bunds from clearing trees) in controlling risks associated with erosion and sediment controls on this bulk earthworks project.
- The BMD project team invested in a collaborative approach at an early stage focusing on identifying key challenges, generating risk management strategies, allocating appropriate resources and setting clear roles and responsibilities.
- BMD's ongoing commitment to environmental protection and rejuvenation was recognised with a silver award at the Ipswich City Council Awards for Excellence in the environment category.

STAKEHOLDER AND COMMUNITY MANAGEMENT

BMD has a long standing commitment to providing lasting legacies in the communities in which we operate.

Many of our operations occur within highly urbanised areas and involve significant interaction with the local communities. Stakeholder and community relations is identified as the role and responsibility of everyone that is involved in the delivery of BMD projects, not just the community relations team. BMD works with clients to ensure projects have sufficient stakeholder management plans and the resources needed to lead positive engagement outcomes.

Our corporate systems have been developed to deliver the highest of standards, ensuring we are effectively able to stage works, delineate worksites, manage nearby stakeholders and safely ensure access from secure areas without incident and impact on business operations.

"BMD approached a very difficult site with multiple stakeholders and user groups, unique climate conditions and limited access with precise and meticulous planning. Their commitment to ensuring that the project was delivered on time and on budget ensured that their management of the site and public was excellent."

**Jamie Hoskins, City of Charles Sturt,
Henley Square Redevelopment**

HENLEY SQUARE REDEVELOPMENT

HENLEY BEACH, SA | \$8.4 MILLION

CITY OF CHARLES STURT

The Henley Square Redevelopment project was a complete revitalisation of Henley Square, located in one of Adelaide’s busiest beachside suburbs. The works were situated in a highly sensitive area amongst local traders and residents where works were coinciding with normal operational trading hours. The objectives of the project were to ensure Henley Square became a multi-functional space that allowed for outdoor dining, water features and additional seating facilities, which would in turn activate the space for all users to enjoy.

Stakeholder management and community consultation was imperative both prior to and during the project. Preliminary consultation with local residents and businesses assisted in the development of a construction methodology that was sensitive to community needs. The project team created a stakeholder management matrix, as part of the Stakeholder Management Plan. This matrix detailed the pedestrian, delivery and vehicle access of each stakeholder at each stage during construction works.

BMD proactively engaged stakeholders at all stages of the project through regular communication, updating audiences on upcoming works and the progression of the redevelopment.

KEY OUTCOMES

- BMD successfully met critical milestones, completing the overall project prior to the busy summer trading period of 2015/2016, ensuring a great outcome for all stakeholders.
- Through a value management process, BMD saved the client approximately \$800,000 on the original tender value, bringing the project back within the client’s budget.
- By successfully managing the construction works throughout winter months, the project team ensured minimal disruption on the local business and community.
- The project team successfully and efficiently managed over ten local businesses, local residents and the general public.
- Due to an uncompromised commitment to safety, the project was delivered with zero lost time injuries.
- The project won the 2016 Civil Contractors Federation South Australian Earth Award for Category 3, projects valued over \$5 million.

COHEN STREET UPGRADE AND BELCONNEN

BUS INTERCHANGE

BELCONNEN, ACT | \$17 MILLION

DEPARTMENT OF TRANSPORT ACT PLANNING AND LAND AUTHORITY

BMD was contracted to undertake the demolition of the existing busway interchange on Cohen Street. A new busway interchange was constructed approximately 1 kilometre in distance to meet the growing needs of the local community and public transport users. Construction works involved both civil works, and services associated with a new and improved public transport busway, which has significantly enhanced the Belconnen town centre amenity.

The works required significant stakeholder management to ensure project delivery would not impede on the operations of the public transport bus system. BMD had a robust understanding of the competing priorities and needs of the client’s stakeholders to mitigate risks, overcome challenges and communicate outcomes.

The project team implemented various strategies to ensure impacts to residents, motorists and the environment were minimal. This included delineating worksites and safely managing stakeholders to ensure access to secure areas.

KEY OUTCOMES

- BMD instituted regular coordination meetings for each section of works. This ensured all relevant stakeholders were engaged about works specific to their area of interest and promoted the sharing of knowledge and brainstorming to overcome issues.
- Works were completed in accordance with Australian Capital Territory specifications, several service utility providers specifications and all environmental management and safety management plans.
- The successful completion of the project has increased the capacity of the facility and accommodated for an increase in the number of bus services.
- The project won the 2011 Civil Contractors Federation Australian Capital Territory Earth Award for Category 3, projects valued over \$5 million.

THE BMD GROUP

BMD IS A NATIONAL GROUP OF COMPANIES ENGAGED IN ENGINEERING DESIGN, CONSTRUCTION AND LAND DEVELOPMENT FOR CLIENTS AND PARTNERS IN THE URBAN DEVELOPMENT, TRANSPORT INFRASTRUCTURE, AND ENERGY SECTORS.

BMD Constructions offers civil construction services for major infrastructure projects throughout Australia. Expertise, experience and resources are applied across the industry sectors of transport, water, rail, port, resources and energy. The company engages in projects ranging in value from \$1 million to in excess of \$1 billion as a principal contractor and in joint venture with other major contractor and design partners.

BMD Industrial, a division of BMD Constructions, is managed by a group of highly experienced industry executives who assemble professional project teams to deliver structural, mechanical, piping and electrical solutions for a diverse range of clients and industries.

BMD Urban is a specialist civil and building contractor to the urban development industry. The company draws on significant industry experience and utilises management systems, delivery methodologies and a relationship based approach that is specifically tailored to the needs of this industry. Integrated services can be offered in partnership with Empower Engineers & Project Managers, JMac Constructions and Urbex to achieve seamless and cost effective project delivery.

Empower Engineers & Project Managers (Empower) provides superior civil, structural and geotechnical engineering design and project management services. Empower's experience includes residential, commercial and industrial developments, infrastructure, and resource and energy projects across metropolitan, regional and remote areas. Key services include planning and feasibility studies, road infrastructure design, flood studies, land development and services design, water quality and stormwater management, structural engineering and shoring, and foundation design.

JMac Constructions (JMac) specialises in all aspects of landscape construction including residential, commercial, industrial, public infrastructure, environmental rehabilitation and long term care and maintenance. From street scapes, boardwalks, public structures, stone entry statements, playgrounds and parklands, JMac has the ability to successfully construct and create unique landscapes of all shapes and forms.

Urbex is an innovator in residential and commercial development, undertaking wholly owned projects and joint ventures in developments of varying scale and size. Harnessing leading talent in project structuring, planning, management, delivery and marketing, Urbex delivers excellence in the creation of new communities to meet the lifestyle needs of Australians today and into the future.

WE SEE OUR STRENGTHS IN THE QUALITY
OF OUR PEOPLE AND OUR GENUINE
RELATIONSHIPS WITH CLIENTS, PARTNERS
AND COMMUNITIES.

WE SEE OUR SUCCESS LINKED TO OUR
ABILITY TO DELIVER CERTAINTY THROUGH
CONSISTENT PERFORMANCE AND
COLLABORATION.

WE SEE OUR FUTURE SHAPED BY ALL THAT
HAS MADE US SUCCESSFUL IN THE PAST.
