

# OUR CAPABILITY BRIDGES

BMD has a strong reputation for improving transport infrastructure through the construction of bridges across a range of challenging environments such as over rail, over water, within complex road overpasses and highly trafficked urban corridors, as well as remote and regional locations. Through highly experienced project teams, strong management systems and an uncompromised commitment to excellence, BMD ensures the timely and safe delivery of quality projects across the country.

## WHAT SETS US APART FROM THE REST?

### INNOVATIVE CONSTRUCTION

- Innovative design and construct solutions by BMD's experienced project teams, with the capability to construct and install bridges onsite, as well as construct offsite and transport structures to site for installation.
- Capacity to complete all elements of bridge construction from the supply of precast concrete to self-supporting bridge structures, as well as incrementally launching bridges to alleviate access requirements in restrictive spaces surrounded by existing buildings and high traffic environments.
- Expertise in managing projects within live operating environments such as busy highways, suburban roads, rail corridors and waterways. BMD minimises impact to daily operations, local communities and ecosystems amidst inherent risks, including working at heights and installing large structures.

### RELATIONSHIP-BASED COLLABORATIVE APPROACH

- Established relationships with suppliers, contractors and clients leading to repeat business as a trusted partner in constructing bridge infrastructure in rural, remote and metropolitan areas.
- Maintaining a high level of interaction with asset owners to establish exclusion zones, secure approvals for specific works for effective traffic management and overcome challenges involved with working in live operational environments.
- Engaging local staff and suppliers with a strong commitment to reconciliation and equal opportunity while working in partnership with local Indigenous and non-Indigenous organisations who embody our values.

### SUSTAINABILITY IN THE MARKET

- Flexibility of a large Australian owned private company with the ability to self-perform projects and an in-depth understanding of the scope and methodologies required to deliver major bridge infrastructure projects.
- Performance acknowledged through multiple industry awards for construction, health, safety, environment and quality management and staff excellence.

## THE BMD WAY

As BMD continues to grow and expand, our culture and relationship-based approach to projects, and collaborating with our partners to deliver exceptional bridge infrastructure projects achieving sustainable outcomes for our clients, has seen us receive continuous support from our loyal client base. What makes BMD different is our value system, unique culture and general commitment to all staff, with a strong belief that 'our business is our people'.

## FINANCIAL PERFORMANCE

Since establishment in 1979, BMD has enjoyed strong growth, and now consistently exceeds \$1.5 billion annual revenue.

BMD is supported by stringent management systems, a strong balance sheet and prudent financial management.

## HSEQ EXCELLENCE

The safety of our people, the environment and community are BMD's highest priority. BMD holds industry-recognised multi-site certifications for health, safety, environment and quality management systems, as part of our integrated Business Management System. We are committed to an uncompromised safety culture and strive to achieve HSEQ excellence.

# KEY PROJECTS BRIDGES

Delivering exceptional bridge infrastructure to connect road networks in metropolitan, regional and remote areas across Australia.

“ The BMD team delivered an innovative and effective option to build a new bridge north of the existing bridge and realign the highway to the east in this regional area of New South Wales.

The project team delivered a program that incorporated several important milestones that contributed to construction efficiency and risk mitigation. The successful delivery of all traffic switches can be attributed to the commitment and dedication demonstrated by the project management team. The delivery of the project on time and on budget while also achieving no serious safety or environmental incidents has been highly regarded.

With the realigned highway now open, the project has achieved its objective of improving road safety, improving freight efficiency and reducing travel times along this stretch of road which has a history of crashes. This is a testament to the highly effective and collaborative BMD team. ”
