

OUR CAPABILITY DEFENCE

BMD has a thorough understanding of the Department of Defence's compliance requirements and security protocols, and the in-house capability to design, construct, upgrade and maintain defence infrastructure in metropolitan, regional and remote communities across Australia. Our experienced project teams can deliver airport runways, taxiways and aprons, defence training facilities, housing and landscaping, as well as install and relocate utility services such as stormwater, wastewater and pipework.

WHAT SETS US APART FROM THE REST?

CONSTRUCTION IN HIGHLY SENSITIVE, SECURE ENVIRONMENTS

- Innovative engineering and techniques for importing and placing highly specified and technically demanding unbound, bound and asphaltic airport pavements. Effective management and staging of works to facilitate a seamless construction process in time critical, high security and live operational environments amidst constant aircraft movement.
- An in-depth understanding of the scope and methodologies that are required on multi-disciplinary defence infrastructure projects, expertise in establishing and maintaining site perimeters and implementing segregated work zones including ingress and egress to airside sites via secure gates without incident.
- Experience within brownfield defence sites and significant investment in plant and equipment to self-perform all defence related work in airside infrastructure projects including forming, concreting, paving, curing, saw-cutting and jointing.

RELATIONSHIPS, COLLABORATION AND OUTCOMES FOCUSED

- Capability to successfully deliver a range of defence projects ensuring best for project outcomes, and experience working within our clients' systems to maintain a security interface ensuring zero unplanned interruptions to airside operations.
- Established partnerships with experienced professionals in all aspects of defence, and a collaborative contracting model enabling consistent communication with clients to proactively manage risks and challenges while working within strict defence protocols and time constraints.
- Engaging local staff and suppliers with a strong commitment to reconciliation and equal opportunity while working in partnership with local Indigenous and non-Indigenous organisations who embody our values.

SUSTAINABILITY IN THE MARKET

- Flexibility of a large privately owned Australian company with the ability to self-perform projects and an in-depth understanding of the scope and methodologies required to deliver airside and landside defence infrastructure projects.
- Proficient staff who deliver key project components such as detailed planning and scheduling, resourcing and execution of critical activities, and are supported by BMD's robust management systems with performance acknowledged through multiple industry awards for construction, health, safety, environment and quality (HSEQ) management and staff excellence.

THE BMD WAY

BMD's specialist expertise in airside and landside works within live, operational, high security defence environments, coupled with our innovative design and construct solutions, is what sets us apart. As BMD continues to grow and expand, our culture and relationship-based approach to projects has seen us receive continuous support from our loyal client base. What makes BMD different is our value system, unique culture and commitment to all staff, with a strong belief that 'our business is our people'.

FINANCIAL PERFORMANCE

Since establishment in 1979, BMD has enjoyed strong growth, and now consistently exceeds \$1.5 billion annual revenue.

BMD is supported by stringent management systems, a strong balance sheet and prudent financial management.

HSEQ EXCELLENCE

The safety of our people, the environment and community are BMD's highest priority. BMD holds industry-recognised multi-site certifications for health, safety, environment and quality management systems, as part of our integrated Business Management System. We are committed to an uncompromised safety culture and strive to achieve HSEQ excellence.
